STEVENSWOOD
Changing the World of Surfaces

Premium STOCKED MELAMINES

AMERICAN LAMINATES EIR

AmLam EIR is so realistic to stained versions of real wood species that it is often mistakenly recognized as real wood. Embossed in registration (EIR) is where the printed pattern aligns perfectly with the embossed texture making it feel like wire brushed lumber except with advantages of prefinished panels.

Our cabinetmakers preferred panel! American laminates AMPINE NAF AMLAM M2 is stamped on every panel and is an industrial grade core that was developed specifically for machining. If you have not tried it you will immediately recognize the difference in how smooth it cuts. No added formaldehyde (NAF) is standard in every panel, not an extra charge or specification you need to ask for.

STEVENSWOOD LEGNO

True realistic wood patterns. Legno is texture matched woodgrains that have an embossed feel registered to the printed pattern. Legno is available in 12 on trend colors and 4 distinct embossed patterns that mimic lumber species like: Oak, Walnut, Cherry, and Alder. The full line of Legno by Stevenswood is available as part of our coordinated surfaces line with Perfectly matched: Board and Edgebanding.
