## FROSTED ACRYLIC BACK-PAINTED GLASS

10x more break resistant than real glass

On-site adjustments with normal tool processing

Writable Surface

50% lighter panels mean flexible design and ease of installation on site.

Unlike real glass, Crystal Slim is 50% lighter and can be cut, drilled and routed on the job site.

### Better options for glass.

RAUVISIO Crystal gives all the beauty of back painted glass with none of the drawbacks. It can be cut and drilled with standard woodworking tools, and requires no aluminum frame. Crystal Acrylic Glass Surfaces act as a chalk (Matte) board with no special coating and no left over ghosting when wiping away. These are available in on-trend solid colors. Crystal is available as two different material constructions: 19.5mm board or 4mm thick Slim Material.

Scan here to see full range of colors, product specifications, downloads for technical information, and installation videos of Crystal Slim.

## COORDINATED MATERIALS

### BOARD

- SHEET SIZE: 51" x 110"
- THICKNESS: 19.5MM (3/4")
