- LUMBER INC. -

EDITION 2

COORDINATED MATERIALS • DECORATIVE SURFACES • HARDWARE • ARCHITECTURAL LUMBER • CUSTOM MILLING • CUSTOM LAYUP • MADE TO ORDER DOORS

Driven TO BE DIFFERENT

Peterman is a resource for customers to select quality wood products and decorative surfaces for cabinetry, furniture, and fine woodworking in both residential and commercial applications.

It is our mission to be the resource for our customers to find premium solutions in the modern age where craftsmanship, quality, and efficiency are essential to thriving.

Our yard is open to all projects big & small. Whether you are looking to come in and hand select one stick of lumber or have us load up a full truck to deliver to you we value your needs and deadlines.

We are a family owned company and stand behind all our products and understand that our business helps to support yours. Everything you find here at Peterman was brought in specifically because it was something our customers asked for. We pride ourselves to say that we bring in products that exceed your expectations and deliver on your deadlines.

We are driven to find the best and most innovative suppliers to provide you with thought through product lines that solve problems, not creating more. With materials designed to save you time, have reliability that puts your mind to ease, and quality that you pass onto your customer, all adds more to your bottom line, to help make your business more successful.

Peterman also makes sure that we offer materials sourced from sustainable mills. The longevity of our business is directly tied to our ability to take care of our planet & our customers.

From our service to our products we are a customer DRIVEN supplier. We want to make purchasing your materials easy and enjoyable. We challenge the ordinary and refuse to be just another wood distributor.

Our vision is to continue to offer the classic materials of today, invest in the cutting edge materials of tomorrow, and to cultivate best practices with the ultimate goal of saving on material, time, and labor so our customers can put that value back into the things that mean most to them.

Peterman Lumber has been a family owned business since 1979. It started out as a small shed with hardwood lumber and has grown not only to fill our 14 acre lumberyard in Fontana, CA, but also in the variance of our product offerings and custom capabilities.

1979

- Founded by Clair "Pete" Peterman
- Delivering Orders since Day 1
- Lumber, Custom Milling, & Panel Products

2000

- Partnered with Specialized Milling

2009

- Obtained KML melamine line and Nevamar Laminates

2013

- Became exclusive distributor of Formica in Las Vegas & Phoenix
- Brought in Hybond Adhesives for laminating Formica Products
- Launched Cut to Size Program

2015

- Purchased Cold Lamination Press to Layup HPL and Veneer

2018

- Brought in Made to Order melamine doors
- Have a full line of coordinated materials & hardware to open up cabinetmakers to European trends
- Brought in European Hardware Styles

1981

- Moved into Fontana Headquarters
- Fontana property developed from an Olive Grove
- Opened Las Vegas Yard

2006

- Reopened Las Vegas Yard

2012

- Opened Phoenix Yard on 67th Avenue

2014

- Phoenix Quickly outgrew & we moved to Washington St.

2017

- Brought in Decorative Surfaces for easy finishing options

2020

- Brought on Bussolotti Cabinet Systems by Salt Intl.

SPECIALTY SURFACES

Surfaces that beautifully compliment traditional, industrial, or modern trends when used with other natural or manufactured materials from Peterman Lumber’s selection. We feature a variety of surfaces that are machinable with standard woodworking equipment, and can be used in both vertical and horizontal applications.

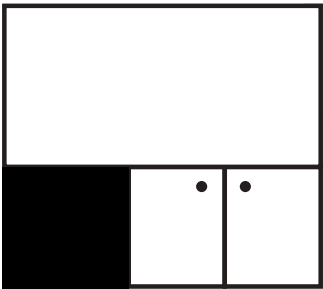

COUNTERTOPS

Peterman has both woodworking machinable countertops as well as made to order quartz and ultra compact countertops.

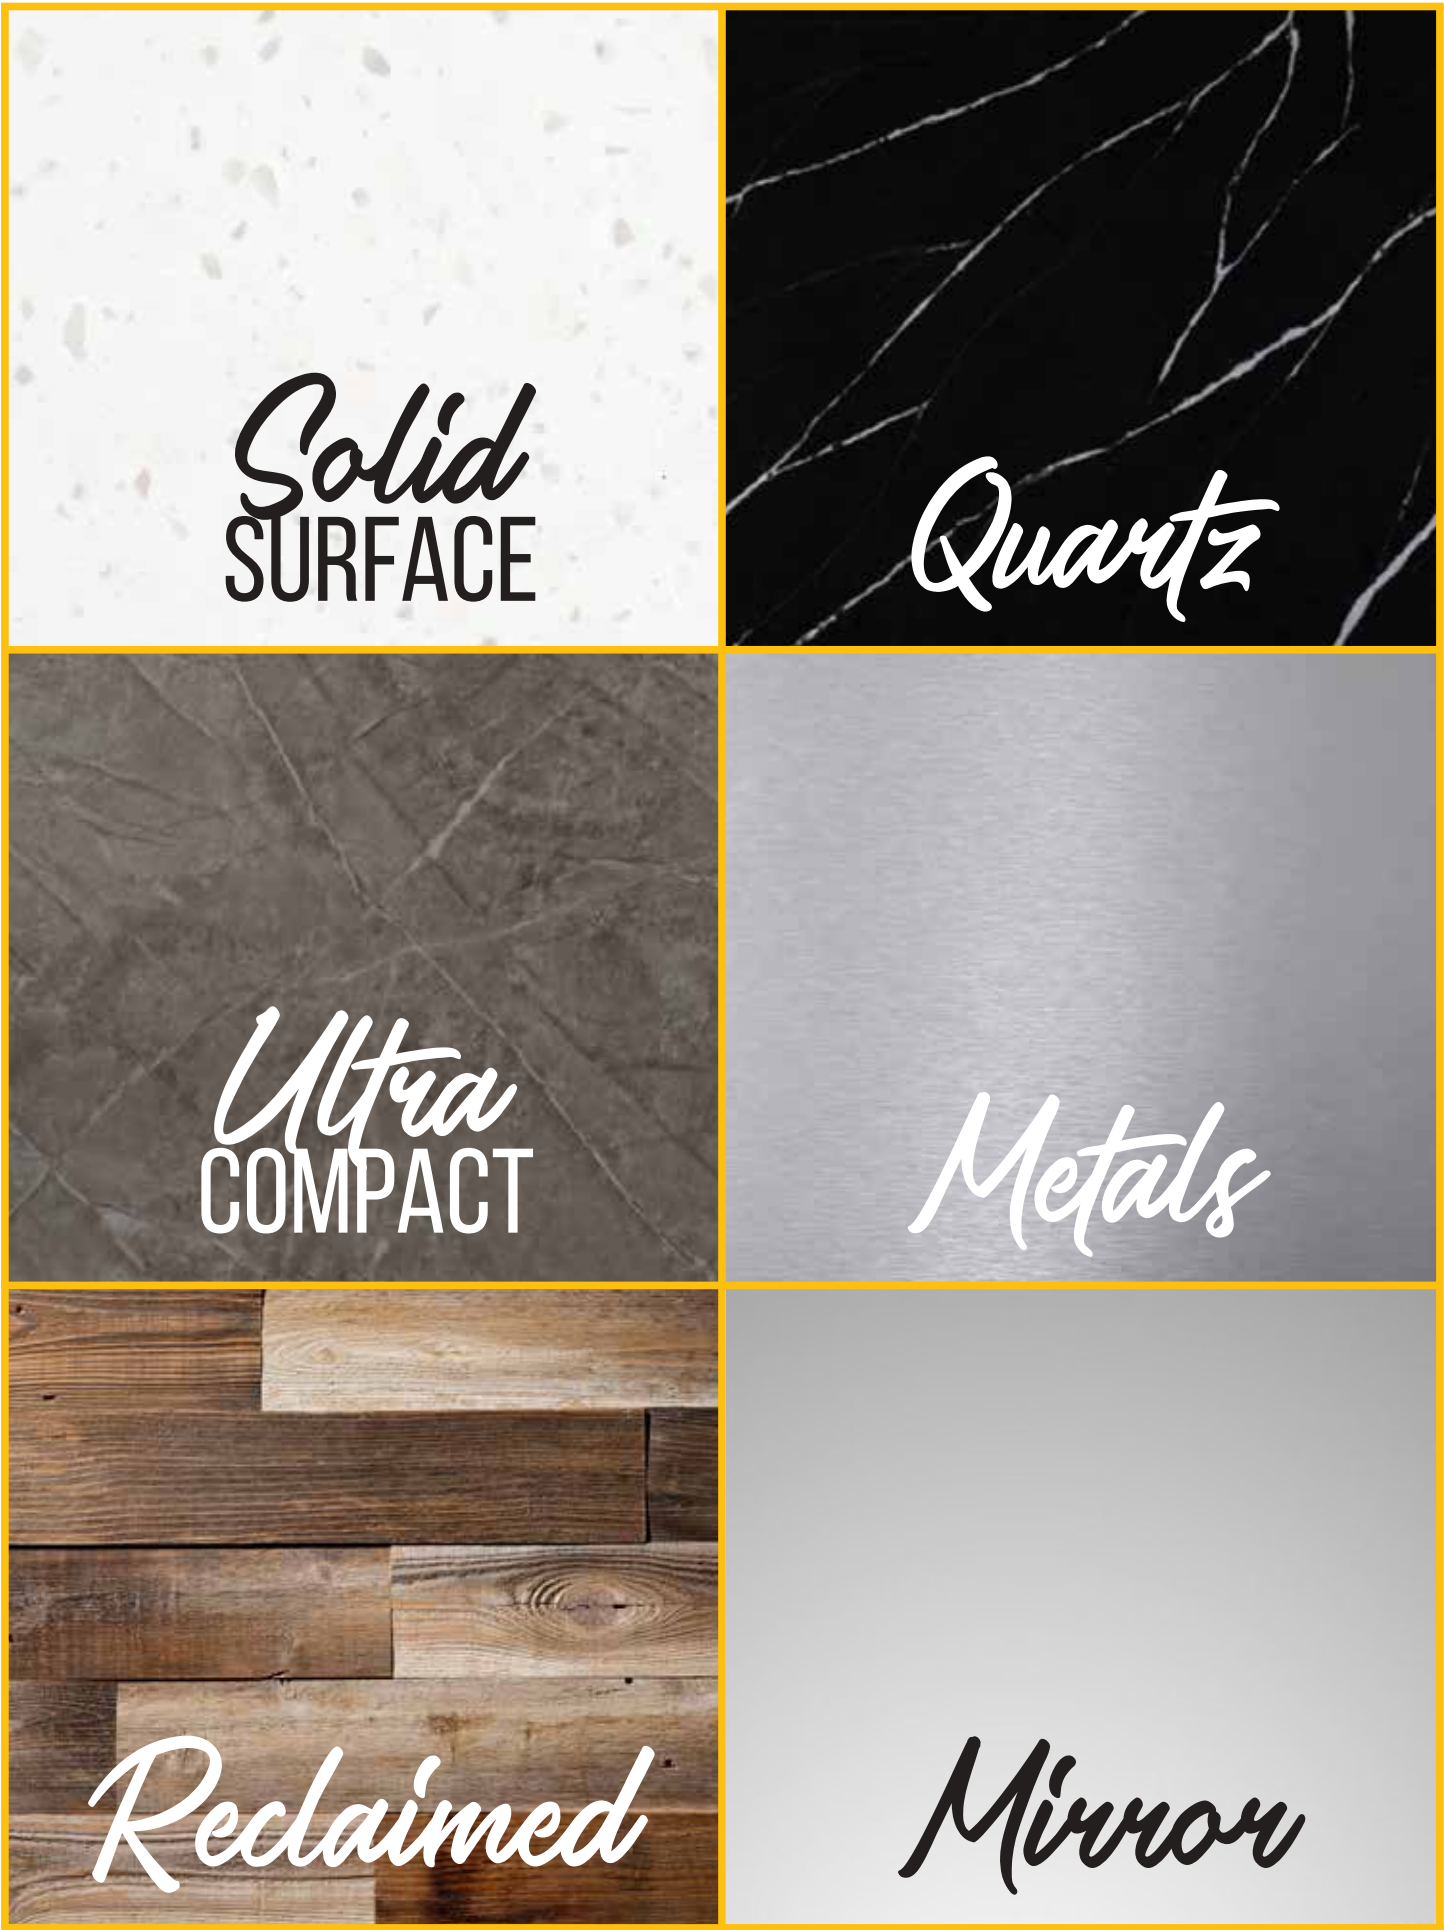

WALL COVERINGS

Whether you are looking for a rustic reclaimed accent wall or some lightweight mirrored sliding doors for closets, Peterman has options that will save you some headaches along the way.

ACCENTS

Looking to add a bit of character or emphasis in your room — use these options as a toekick, surround, or as an alternative to doors.

EVERFORM™

As tough as it is beautiful, Everform™ Solid Surfacing shapes itself to virtually any design concept. The durable, non-porous surface is ideal for a worktable or custom bar top, as well as sinks and shower surrounds.

Available for the LV Quick Pick Program.

PRÄGEBOARD

Real reclaimed wood with the advantage of manufactured panels and deep surface texture. These rustic veneers come in three natural weathered colors and three different surface embossing options that range from .5mm-3.5mm deep and come prefinished in a matte finish.

PRODUCT FEATURES

- Waste optimized large format
- Embossed real wood veneers
- Cracks & knotholes filled for premium workability
- Smooth and splinter free
- Matte finish
- Matching Edgebanding Available

PRODUCT SPECS

BOARD

- SHEET SIZE:
118" x 47-5/8"
- THICKNESS:
20mm (Struktur-Board)
19.5mm (Diamant & 2.0)

EDGE BAND

- ROLL LENGTH: 328'
- THICKNESS: 0.9mm
- WIDTH: 23mm

SURFACE STRUCTURES

STRUKTUR-BOARD

This veneer is ideal for uniform surfaces. The 0.5mm deep embossed grain texture has a pleasing hand feel while keeping an overall flat surface.

SURFACE
Ideal for Flat Surfaces
Contemporary matte finish

FORMAT
1mm Thick Veneer
2800 X 1250 mm / 110 x 49 in

DIAMANT

This veneer was cast from the outer layer of 50 year old barn. The original texture of that same barn was cast and pressed onto this real reclaimed lumber to creates a reliable and touchable surface. The perfect choice for a uniform surface with moderate texture.

SURFACE
Moderate Texture
3-D embossed surface free of splinters

FORMAT
4mm Thick Veneer
2980 x 1250 mm / 117 x 49 in

DIAMANT 2.0

Our deepest texture. This veneer takes the same natural texture of DIAMANT to the next level. With an even deeper embossing (up to 3.5 mm deep) this visually striking texture is complimented by indirect lighting highlighting the highs and lows of the grain.

SURFACE
Deep 3.5mm Surface Texture
Deeper 3-D embossed surface free of splinters

FORMAT
4mm Thick Veneer
2980 X 1250 mm / 117 x 49 in

POPPA'S BARN

This is REAL reclaimed barnwood that is full of charm and none of the prep-work. Available in five locally sourced and naturally weathered colors, and cut to standard widths. So the only installation needed is to simply cut to length and finish nail to your wall.

PRODUCT FEATURES

- Authentic reclaimed wood, distressing, nail holes, and grain color all nature made
- Ready to install: all wood is cleaned, trimmed to size and clear coated.
- Sourced locally from San Bernardino, CA

APPLICATIONS

Easy to install rustic accent for any home, salon, restaurant, or office space.

HARDWARE

***Main Headquarter's available stock list.
Las Vegas and Phoenix stock lists may vary.**

Peterman Lumber, Inc. carries a selection of hardware catered towards closet and cabinetry needs. We have solutions for everything from wood filler and sanding paper for hardwood cabinets, to modern solutions for frameless European style cabinets like soft-close hinges and in-cabinet organization systems. Talk to us about simple ways to make your cabinet assembly easier and more efficient today!

ABRASIVES

Peterman lumber partnered with Surfprep to offer one of the most versatile sanding systems for cabinetry & moulding profiles. Surfprep developed the original foam-backed abrasives specifically to get into deep creases and milled out curves.

DECORATIVE & HANDLELESS

We offer on-cabinet and door-routed profiles designed for large banks of doors or drawers that streamline the fabrication process and give you a clean look. Also, we have modern & decorative door handles and pulls.

FASTENERS

For proper construction and assembly, it is critical to purchase wood screws, cabinet screws, hardware screws, drive bits, and other woodworking products that will guarantee a sturdy hold, easy installation and removal, and an attractive appearance for any project.

ORGANIZERS

These are beautiful options that install in the cabinet for space-saving solutions. Salice has a more contemporary look with metal rails and choice of white or maple melamine base. Pride has economical and useful round and kidney shaped lazy susans.

SHELF CLIPS & TOEKICK SYSTEMS

The details you do not see still do matter. For adjustable shelving, we have options for shelf clips and supports from Pride. For under cabinet support, we have PVC toe-kick systems from Salt International.

ADHESIVES & WOOD FILLERS

Titebond has been the industry standard for over 60 years and designed for interior woodworking. Hybond is our choice contact adhesive for HPL. Famowood wood filler is color matched to our lumber selection and can be sanded, cut, and stained just as you would treat lumber.

DRAWER SLIDES

We have quality solutions for drawer slides when you need economical solutions, choices that will stand the test of time, and for when details matter.

HINGES & DOOR SYSTEMS

Peterman has high performing hinges from Salice and CGS for every cabinet box. Salice is the leader in engineering and is continuously innovating to make the best soft close hinges on the market.

HINGES & DOOR SYSTEMS

Peterman carries 10ft melamine for floor to ceiling seamless closets and the hardware to make them productive and functional.

LUMBER

We are called Peterman Lumber right? Come expecting to see some beautiful high end Hardwoods and Softwoods. There are 2 things in particular that separate Peterman Lumber from other lumber yards. The first is our lumber caters to interior grade or architectural applications and the second is our will call facilities are one of the very few that allow for you to come & hand select your lumber — or have us hand select per your specifications and deliver it directly to you.

MILLWORK

With over 100 moulding profiles in stock and capabilities to make any shape you can imagine in any of our lumber selection. We should be your first and favorite stop for stock & custom millwork.

LAYUP

From selecting your own core materials to the veneer or laminate that goes on top, we have you covered for any specification you may need: fire rated, no-added formaldehyde, screw holding capability, lightweight, etc.

VERTICAL GRAINS

Don't end up with a mixed bag of unusable grades. Peterman Lumber looks for more aesthetics over construction. Our vertical grains are export quality and have tighter growth rings and are an attractive material to designers & builders alike.

PREMIUM PULLS

Peterman has specifications we request over the industry standard where we look for; clarity, widths, color, and specified defects (like figure or rustic grade) to help you achieve your desired look.

HOW WE STOCK AND PRICE

At Peterman Lumber we have a wide selection of specifications driven hardwoods to achieve the look you are going after. Our stock is geared towards interior architectural applications including cabinetry, furniture, doors, instruments, and other fine woodworking.

1. PREMIUM PULLS

Aesthetics outside of grade that Peterman Lumber specifies from our mills: clarity, wide widths, and specified defects.

2. COLOR PULLS

Where Peterman specifies limited allowable sapwood or heartwood to give you the color consistency you are looking for.

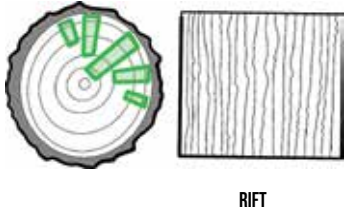

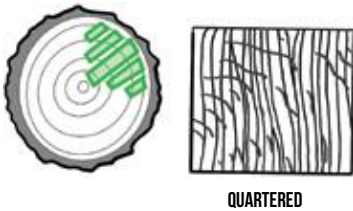

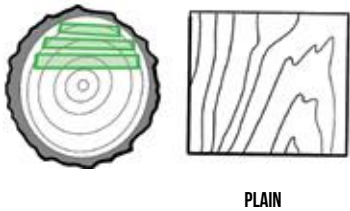

3. WIDE WIDTHS

Different species have different allowable widths. For wider trunked species we do have wide pulls available. Not all trees are created equal, see below:

4. CUT TYPES

All cuts are plain sawn unless otherwise specified. Some species have vastly different grain patterns depending on how they are cut. Look to see if your species has other cuts like: Quartered or Rift.

5. GRADES

Depending on your use of the lumber you may need to specify the grade. Common grades we have available are: clear, rustic, or furniture grade. The more detail you can give our trained reps on your specific needs the easier it will be for us to find you the right grade you are looking for.

WE STOCK 3 *ways*

● TYPICALLY IN STOCK ● SPECIAL ORDER *SUBJECT TO AVAILABILITY

HOW WE CHARGE

Lumber is sold in the rough for no added charge. This is for our customers that want to use the organic characteristics of the lumber in their projects. We do have milled options available so you can have a quality straight edge on your lumber. Milling service is charged at 10% of the total footage of the material and we use our industrial grade equipment to straight edge material for you. The advantage of having us do the straightening is that it is cut with minimal waste and you can have an accurate straight edge to work off when using commercial grade tools.

LARGE RUNS ARE MEASURED BY TALLY STICK AND YOUR PRICE CALCULATED BY THE BOARD FOOT CALCULATION BELOW. YOU ARE PAYING FOR THE VOLUME OF THE LUMBER.

(

DIVIDED BY 12

DO NOT FORGET TO ADD 10% FOR STRAIGHT LINED AND SURFACED MATERIAL

DOMESTIC HARDWOODS

Peterman Lumber is one of the only will call facilities that let you come hand select your own lumber. We have great relationships with all of our domestic mills and if we do not have it in stock can usually get a hold of it for you. All types of cuts are plain sawn unless specified.

HARDWOOD VENEERS

Peterman Lumber has over 200 Veneer options available where you are able to select the slice type, match type, pattern, & even specify custom lamination on any of Peterman's core options.

At Peterman Lumber, you can:

1. SELECT YOUR *Slice Type*

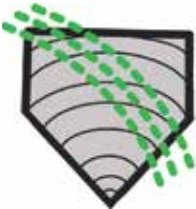

ROTARY CUT

PLAIN SLICE

QUARTER SLICE

RIFT CUT

2. SELECT YOUR *Backer Type*

PAPER

WOOD BACKED

PEEL & STICK

**laid up to your specification*

3. SELECT YOUR *Match Type*

BOOK MATCHED

Every other leaf is turned like a page of a book – producing a mirror image.

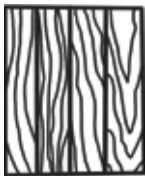

SLIP MATCH

Leaves are joined side by side – resulting in a repeat of the grain pattern.

RANDOM MATCH

Veneers are joined with the intention of creating an unmatched effect.

REVERSE SLIP MATCH

Similar to Slip Match except that each leaf is reversed to the oppsotie end.

200+
 VENEER OPTIONS
available

RECONSTITUTED VENEERS

Reconstituted or “Recon” Veneers are made by grinding pulp and combining dyes to achieve an exotic look. These high end looks achieve two goals that real wood cannot: it has complete consistency where every sheet will look the same and meets an economical price point.

PANEL

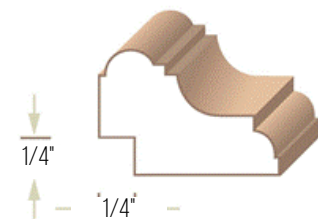

Panel moulding is a great way to dress up any 90 degree angle. It can be used to replace edge tape on panel products to give a decorative edge detail, instead of a flat edge. Panel moulding can also be used on the inside of door and drawer framing to give great detail without having to pull out your router set.

SPECIAL APPLICATIONS

BAR NOSING P-902

Use for bar top edges, so drinks won't slide off the edge. Milled with a 90 degree inset to lay on your horizontal surface and have a sturdy overhang.

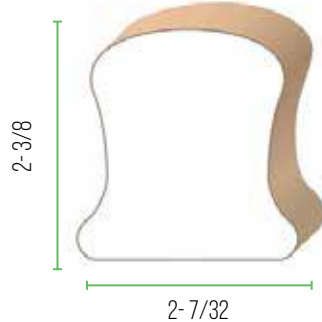

CLOSET ROD P-910

Full round has many uses but is especially thought of as a closet rod. Classic material that stands up to heavy weight without the clinking sound of metal.

1-3/8 DIAMETER
AVAILABLE IN 1-9/16, 1-1/16, 13/16, 5/8, 1/2

HAND RAIL P-9100

This simple profile has a variety of styles with different hardware or applications. Either dowel in directly for a freestanding handrail or with J hooks directly to the wall.

AVAILABLE IN

*Please check with your sales rep for current stock & availability of each profile in the species you are looking for.

INTERIOR GRADE - COMPOSITE PANELS

A favorite especially for our prefinished melamine board cores, and to custom lay up laminates. These core materials are valued for their smooth unblemished surfaces and homogenous cores giving them a stable and reliable surface.

MDF

FEATURES

- Stability
- Predictable and reliable
- No Cupping
- No Warping
- No Shrinkage

OPTIONS

- Medium Density
- Fiberlight
- Ultralight
- No Added Formaldehyde (NAF)
- Fire Rated
- Moisture Resistant

PARTICLE BOARD

FEATURES

- Stability
- Predictable and reliable
- No Cupping
- No Warping
- No Shrinkage

OPTIONS

- Pine
- Fir
- High Density
- No Added Formaldehyde (NAF)
- Fire Rated
- Moisture Resistant

INTERIOR GRADE - SOFTWOOD PLYWOOD

When you are looking for outstanding screw holding strength and a lighter weight than composite.

CORES AVAILABLE:

PREMIUM CALIBRATED J CORE

Calibrated with Tightest Tolerances and Lightest Weight.

MDF CROSSBANDS

Laminated with MDF crossbands to achieve the flat surface of MDF while still providing plenty of screw holding power.

DOMESTIC VENEER CORE

Screw Holding of plywood with the flatness of MDF, with the same light weight of our premium J Core.

***Our Most Popular Option**

INTERIOR GRADE - HARDWOOD PLYWOOD

Peterman's hardwood plywoods not only have a hardwood veneer face and back, but the core ply's are also made from hardwood. This combination gives you a decorative face that can quickly be stained and finished, but also is much more stable and economical option than solid wood.

Hardwood plywood has many of the same uses of solid hardwood lumber such as (but definitely not limited to): cabinets, furniture, built in closets, doors, paneling, exhibits, musical instruments, and even skateboards.

BALTIC BIRCH

PRODUCT FEATURES

- Baltic Birch Face & Core
 - European Edge has an appealing exposed edge
 - Great Stability
 - Stays flat because of the manufacturing process
 - 5x5' core comes with our standard interior glue line
 - 4x8' comes with a moisture resistant phenolic glue line
- * Also carry in 1 or 2 sided prefinished panels (see page 31)
- * Ask us about our imported birch.

Challenge the ordinary

POPLAR

Garnica's lightweight panel is composed entirely of European sustainable plantation grown poplar.

Maximum sustainability thanks to poplar sourced from fast-growing plantations.

This wood provides lightness, stability, surface quality and ease of machining.

- Light weight veneer core
- Void free core
- 100% Poplar Core
- Excellent smooth surface for laminating

ALSO AVAILABLE AS FIRE RATED

Garnica has the *only* Class A Fire Rated hardwood plywood material that you are able to laminate onto.

All other fire treated plywoods are post treated with chemical that only goes surface deep and usually leaves lifted fibers and a rough surfaces.

Garnica Poplar Fire Treated Plywood treats each ply individually and is then pressed together giving you a panel that you are able to sand, mill, route, and treat as an untreated panel without weakening the fire treatment. Gives extra peace of mind to your customers for commercial applications and in public spaces.

EXTERIOR GRADE - COMPOSITE PANELS

Extira is a revolutionary product for exterior applications that performs better than wood or MDF. Extira panels may look like MDF, but they don't perform like it. Different ingredients and a patented and proprietary manufacturing process lead to a superior performance.

EXTIRA[®]
by JELD-WEN

Extira is easy to work with; can be carved, routed and machined. Resists moisture, rot, and termites. Twice as strong as MDF, Extira is made to be used outside.

Plus, Extira panels are covered by an industry leading 10-year limited warranty that far exceeds competitive panel products.

PRODUCT SPECS

PANEL

-SHEET SIZE:
4' x 8'

-THICKNESS:
1/2"
5/8"
3/4"
1"

EXTIRA IS A GREEN PRODUCT

Choosing products that are manufactured responsibly is more important than ever.

Extira uses sustainable products throughout its production processes and has earned third-party certification for no added formaldehyde.

This core material is CARB2 compliant as well as Greenguard Gold certified.

EXTERIOR GRADE - MARINE GRADE PLYWOOD

Thin sheets of wood veneer are used to make plywood. Arranging the sheets in alternating layers are what gives this panel its strength. Waterproof glue in marine plywood protects it from moisture when exposed to water and high humidity. This exterior glue line is what keeps the plywood from delaminating in inclement weather. This is an important design characteristic if you're building a boat hull with plywood. If the hull's protective finish is damaged and the wood gets wet, the plywood will remain structurally intact.

PRODUCT SPECS

PANEL

-SHEET SIZE:
4' x 8'

-THICKNESS:
1/2"
3/4"

APPLICATIONS:

- Boat building and high moisture
- Garden furniture, like tables, chairs, and benches
- Pergolas

FEATURES:

- Voidless Core
 - Calibrated Thickness
 - Greater Strength for cutting and screwholding capabilities
 - Voidless has no knots that moisture can get trapped in
- Exterior glue line
- Won't fall apart in weather

EXTERIOR GRADE - MDO PLYWOOD

Medium density overlay panel, or MDO panel, is a paintable surface made of plywood with a weather-resistant resin overlay bonded to the wood. The resin content in the overlay resists water and gives it great exterior qualities standing up to weather, wear and degradation. MDO's flat surface and great stability make it a favorite for sign makers.

FEATURES:

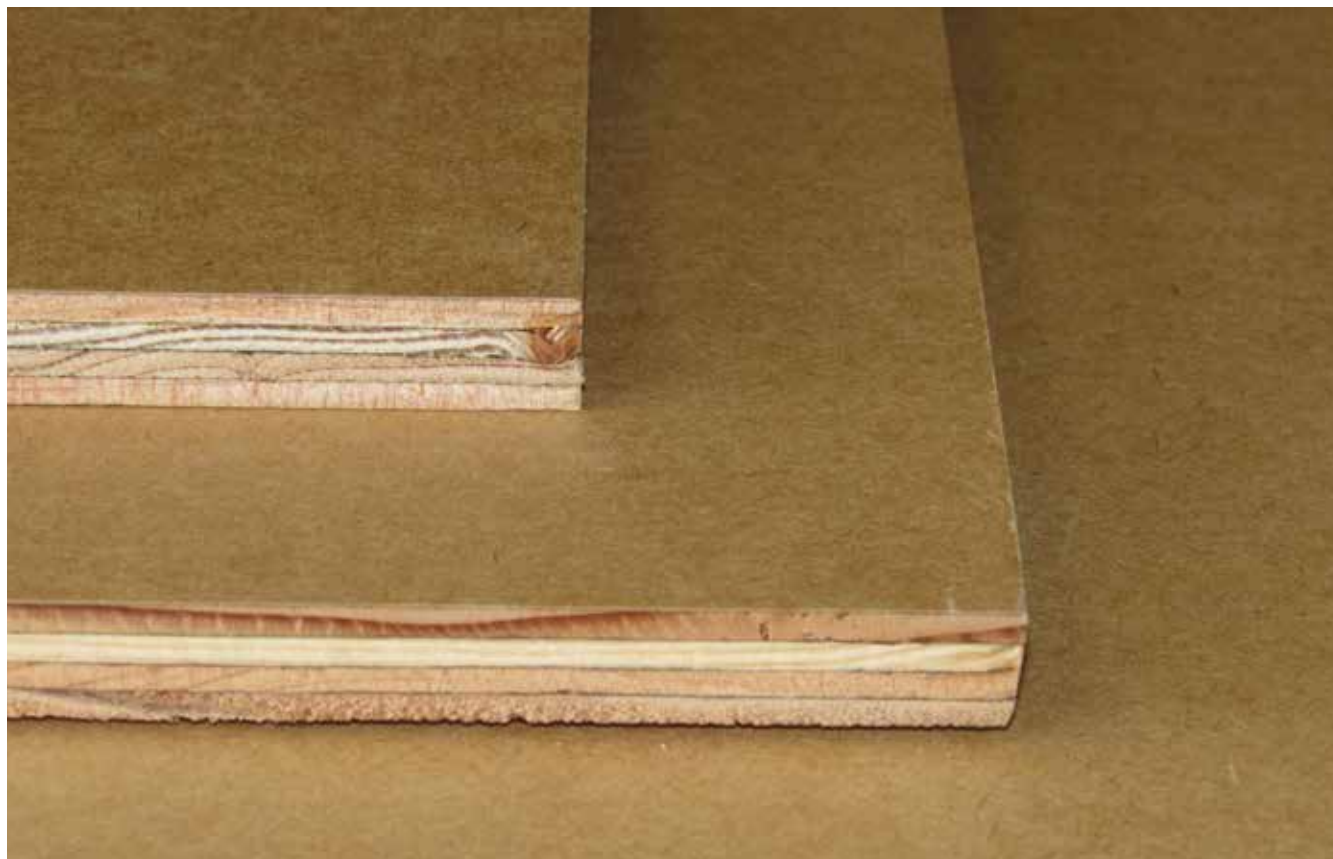

- Weather Resistant
- Ultra Flat Surface
- Outstanding Stability

PRODUCT SPECS

PANEL

-SHEET SIZE:
4' x 8'

-THICKNESS:

3/4"

EXTERIOR GRADE - SOFTWOOD PLYWOOD

Softwood Plywood is plywood which has a face and back veneer of softwood. Softwood plywood panels are comprised of a core made from either softwood then faced and backed with a veneer of soft wood and therefore are used for structural applications.

CURVED FORM PANELS

KERFKORE

FLEXBOARD & TIMBERFLEX

Flexboard from Kerfkore is a bendable substrate panel with a hardboard face that can be formed first and laminated last. The hardboard or poplar face is calibrated for uniform thickness throughout the manufacturing process and smooth enough for veneer layup or to paint on directly.

BENEFITS

- Eco Friendly product with NAF face material and core made from 100% recovered and recycled fiber content.
- The hardboard surface is ideal for painting or laminating paper, vinyl, veneer, HPL, and metal.
- Low cost economical substitute for bending panels.
- 10 inch radius fabrication with no special fabrication.
- Calibrated for uniform thickness results in excellent seam hiding qualities without filling or sanding.

PRODUCT SPECS

► PANEL

- SHEET SIZE: 4' x 8'
- THICKNESS: 3/4"

KERFKORE

KERFKORE

ECONOKORE

Econokore by Kerfkore is a unique 2-ply product that brings you the ability to form curves with less labor and less cost. Made of processed MDF core with a high density overlay, you will find it much easier and more economical to use than bending plywood!

BENEFITS

- Low cost economical substitute for bending panels.
- Saves time with no sanding or patching required.
- No Surface preparation. High density or poplar plywood overlay provides smoother, more symmetrical laminating or painting surface.
- No warping or twisting. A two-ply construction offers a more stable and balanced panel.
- No Size variation. Product is sanded and calibrated for consistent size & thickness.
- No special tools or installation needed Install using standard fabricating tools and methods.

BUSSOLOTTI
by **SALT**
INTERNATIONAL

BUSSOLOTTI CABINET SYSTEMS

Bussolotti is a Ready to Assemble (RTA) cabinet system from Salt International that uses premium components to give you the best quality frameless cabinets. The Bussolotti System paired together with Peterman Lumber's Made to Order Custom Door Program gives you the ultimate flexibility to give your customer beautiful transition to modern styles with no fabrication on your part.

Premium components that are a pleasure to build.

This system offers more than your standard Ready to Assemble (RTA) cabinets. Our Integrated System sets you up for success by offering premium components as a full system designed to work together – down to the screws. The parts go together easily the first time. Bussolotti is redefining box systems by including: industry-leading hardware, water-resistant interiors, time-saving box leveling solutions, and on-trend and in-demand prefinished door options.

Be able to offer your customers a premium product on their schedule. Do not turn down projects because of a long backlog, short staff, or downed machinery. Bussolotti's simple box assembly makes you more efficient while Peterman Lumber's color choices make it feel like a truly custom system. In addition to our 5 options of in-stock Grab & Go Doors, Peterman Lumber can custom make doors to your specification in any of our 175+ prefinished options. Expect commercial-grade durability that is equal to the stunning colors and textures you can choose from.

Ask us about our Bussolotti cabinet system and for a catalog to see our full selection of sizes.

BUSSOLOTTI CABINET SYSTEMS

FEATURES

- Components made from premium linen-textured, 13-hour water-resistant panels.
- Over 175+ premium made to order cabinet doors, available in modern styles:
 - Textured Woodgrain
 - High Gloss
 - Super Matte
 - Acrylic Back Painted Glass & Frosted Glass
 - Metal
 - Concrete
- Includes premium industry-leading box hardware for Euro-style boxes:
 - Salice Silentia+ Soft Close Hinges.
 - Blum Tandembox System with Blumotion soft-close undermount slides.
- Convenient Leveling and Integrated Toe Kicks.
- Options for Salt Intl. Handle free solutions:
 - Gola Integrated Handle System
 - Filo & Karmen Finger pulls
- Storage solutions like trash pullouts, lazy susans, and roll-out shelves.
- Peterman Lumber believes in the reliability and precision of the Bussolotti system and warrants the material and craftsmanship of the components to be defect free and fit together precisely or we will give you a replacement.

PETERMAN
- LUMBER INC. -

IN-HOUSE FABRICATION

STEVENSWOOD®
Changing the World of Surfaces

Time is money. Be able to say yes to more jobs by utilizing Made to Order Doors through Peterman Lumber. With Industry leading quality in 125+ finishes to choose from, 5 different door styles, and the ability to specify the grain direction, your options feel unlimited. With looks that range from traditional to contemporary, you will be able to capture a whole range of customer desires with reassurance. All of our color options are consistent batch to batch and come with built-in water resistance through the core material and PUR waterline adhesives. They will be delivered just as you ordered them – Peterman Guarantee.

Industry leading construction and PUR adhesives make for a quality door that is bundled with Peterman Lumber service and delivery. Each order is fully customized to your specifications with our easy to use order forms. Just select your finish and fill out the dimensions and specifications for each door. Our order form will give you a price that is rounded (up or down) to the nearest sqft giving you an easy quoting tool for when you bid your jobs. When you are ready to place your order simply submit your order form to your sales rep, sign off that all dimensions inputted are correct, and prepare to install when Peterman delivers to your shop or job site.

ADVANTAGES

- 13 Hour water resistant core for all Saviola materials
- 9hr water resistant core for all Innolac and Nitro materials
- Use high strength and waterproof bonding PUR glue
- 125+ woodgrain, high gloss, super matte and metal textures
- Capabilities to choose grain direction
- Capabilities for sequenced grain matched doors
- Have options for Glass Insert and Prep for Glass doors
- Options for contemporary hardware
- Capabilities for floating shelves in matching materials

MATCHED GRAIN OPTIONS

One of the biggest advantages of prefinished surfaces is the consistent pattern and color. Because of these consistencies we are able to offer a matched grain option that is continuous across your doors and drawers, either vertically or horizontally.

This option gives you seamless lines and only possible with prefinished products. Perfect way to use natural elements as a design element.

HORIZONTAL GRAIN

VERTICAL GRAIN

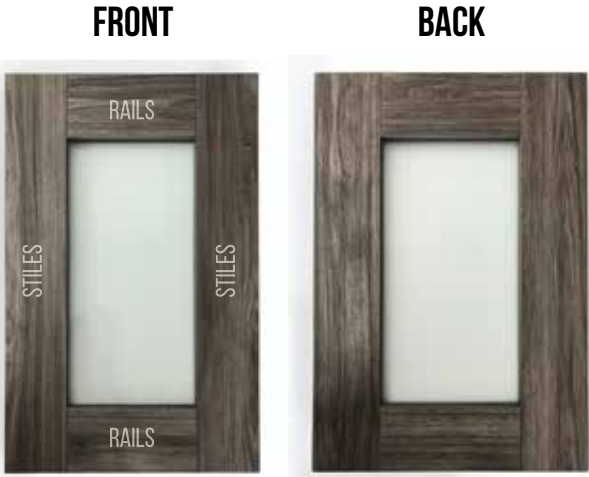

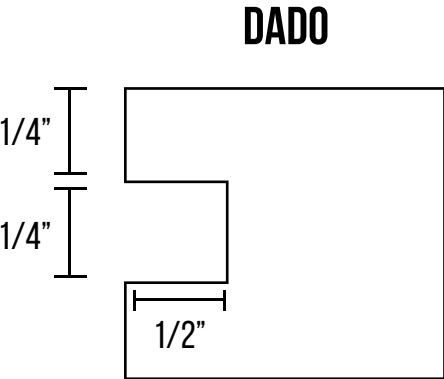

GLASS INSERT DOORS

Shaker style doors with glass already inserted. Glass is fully captured in a dado for a seamless door on both sides.

- 1/4" tempered glass.
- The routed area is painted to match your door.
- Includes your choice of fully captured glass.
- Stiles will run vertical grain and rails will run horizontal grain.

GLASS OPTIONS

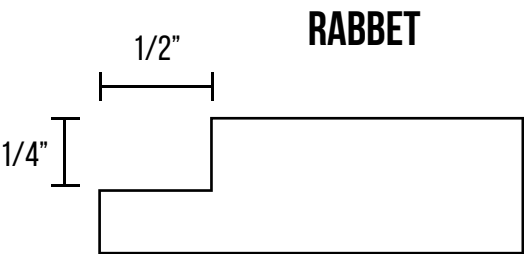

PREP FOR GLASS DOORS

Shaker open style doors come with the back routed out to insert your own glass or center panel.

- Routed to fit any 1/4" insert panel.
- Does not include glass

FLOATING SHELVES

Options for beautifully concealed floating shelves in the same materials as your doors. The brackets are constructed of structural steel and fully welded for superior strength to handle your support requirements. Brackets come powder coated in a black finish, and are easy to install to a finished wall by screwing directly into a stud or attaching with drywall anchors. Once bracket is mounted, the shelf box snugly slides onto bracket for a tight fit. If a woodgrain finish is selected grains will run the length of the shelf. Floating shelves are available in the below sizes 24-72in and have a 4 week lead time.

FLOATING SHELF INCLUDES:

- Floating Shelf Box
- Bracket

REQUIRED FOR INSTALLATION (NOT INCLUDED):

- Wall Screws/Wall Anchors
- Drill/Driver
- Level
- Pencil
- Wall Stud finder

GOLA HANDLE FREE SYSTEMS

Simple. Clean. Efficient. Designed to be a clean solution for a large bank of doors or drawers. The Gola system is routed to fit in flush to your cabinet box. Leaving an exposed decorative metal extrusion to eliminate the need for individual knob or pull hardware on each door.

This is our most efficient and low profile hardware system. Salt International preroutes and drills cabinet boxes for all these profiles to make installation simple. Just select the color of the exposed channel and components will be packaged as a kit and ready to go. Our Gola system is a perfect match to our metal Toekick color options. All of our extrusions are also available as LED lighted options.

FILO & KARMEN - FINGER PULL SYSTEM

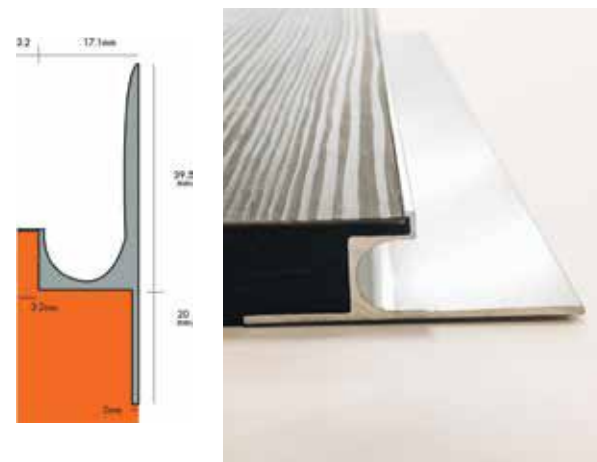

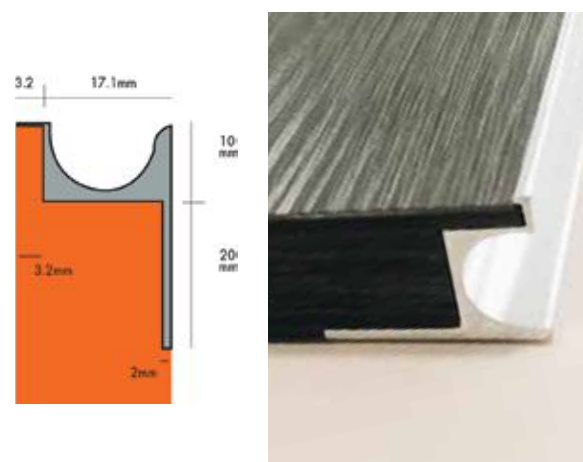

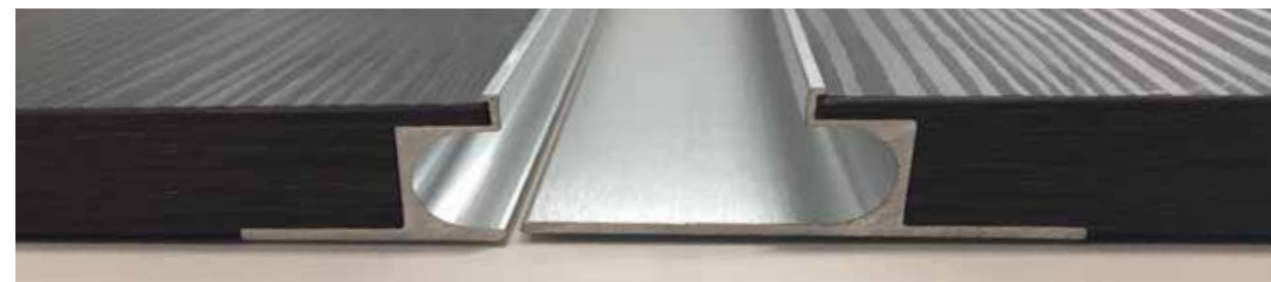

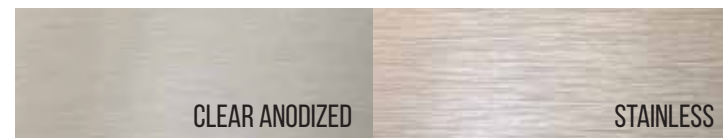

Same sleek look as our Gola system - but used as finger pull application where the installation is on the doors instead of the cabinet box.

Filo & Karmen extrusions give a nice metal grip on the top of your doors or drawers. These two profiles can be used exclusively, but if used together give a beautiful recessed metal separation between drawers. A much faster and economical alternative to install on large banks of doors and drawers than traditional pulls.

INSTALLATION

Simply route one edge of your doors and screw on the extrusion. Filo and Karmen are two separate profiles but the application is the same. Filo Profile is most commonly used as the upper, and Karmen as the lower. This system is available as extrusion only and is not available pre-routed on your doors. Filo & Karmen come in 9ft lengths.

AVAILABLE FINISHES

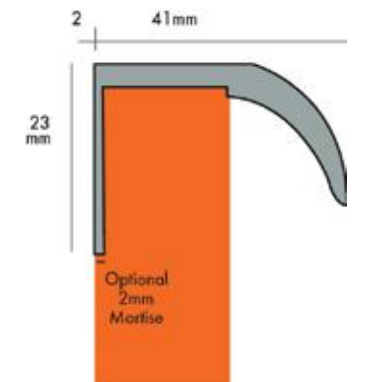

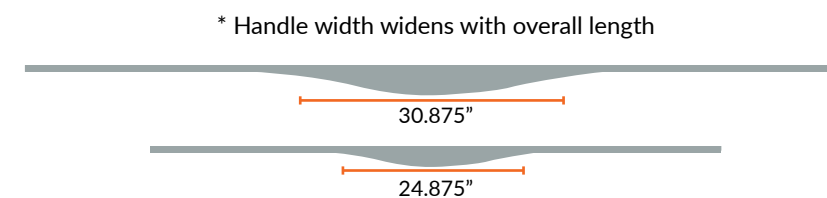

LOLA SCALABLE PULLS

Our Lola Drawer Pulls are designed to be cut to the size of your drawer. What makes these drawer pulls so unique is that the teardrop handle scales to be wider as the overall length of the drawer increases, so you have a handle that never looks too large or too small. Lola gives a decorative touch that is subtle, but will not go unnoticed.

Available in lengths from 12" - 48" and can be used in a vertical or Horizontal application. Lola can be screwed on directly to the door, with an optional 2mm rabbet for flush mounting. Lola is available as extrusion only and is not available pre-routed on your doors.

ZERO-JOINT EDGEBANDING

What is REHAU LaserEdge? REHAU LaserEdge™ is an edgeband with a pre-applied, co-extruded polymer functional layer that replaces the traditional glue used to apply edgeband, allowing for a much superior and seamless joint between the edgeband and the board. Innovative laser and hot air technology creates a seamless, adhesive-free finish that allows longer lasting water & steam resistance to the board.

PRODUCT FEATURES

- No glue line to collect dirt, chip away or yellow over time
- Creates a bond equal or greater to PUR (no delamination)
- Extremely heat and Moisture Resistant
