# WHAT IS BUSSOLOTTI?

## PREMIUM COMPONENTS THAT ARE A PLEASURE TO BUILD

This system offers more than your standard Ready to Assemble (RTA) cabinets. Our Integrated System sets you up for success by offering premium components as a full system designed to work together, down to the screws. Parts go together easily the first time. Bussolotti is redefining box systems by including; industry-leading hardware, water-resistant interiors, time-saving box leveling solutions, and on-trend and in-demand prefinished door options.

Be able to offer your customers a premium product on their schedule. Don't turn down projects because of a long backlog, short staff, or downed machinery. Bussolotti's simple box assembly makes you more efficient while Peterman Lumber's color choices make it feel like a truly custom system. Peterman Lumber is able to custom make doors to your specification in any of our 175+ prefinished options. Expect commercial-grade durability that is equal to the stunning colors and textures you can choose from.

- Components made from premium linen-textured, 13-hour water-resistant panels.
- Over 175+ premium made to order cabinet doors, available in modern styles.
  - Textured Woodgrain
  - High Gloss
  - Super Matte
  - Acrylic Back Painted Glass & Frosted Glass
  - Metal
  - Concrete
- Includes premium industry-leading box hardware for Euro-style boxes
  - Salice Silentia+ Soft Close Hinges.
  - Blum Tandembox System with Blumotion Soft Close Under Mount Slides.
- Convenient Leveling and Integrated Toe Kicks.
- Options for Handle free solutions.
  - Gola Integrated Handle System
  - Filo & Karmen Fingerpulls
- Storage solutions like trash Pullouts, Lazy Susans, and Roll Out Shelves.
- Peterman Lumber believes in the reliability and precision of the Bussolotti system and warrants the material and craftsmanship of the components to be defect free and fit together precisely or we will give you a replacement.

# HYDRO BOX

## 13 HOURS OF WATER RESISTANCE

Water is apart of day to day life. You should have a box system that accounts for that. Our Hydrocore is engineered to stand up to daily abuse because accidents and spills happen. Long showers, and steam from daily cooking can cause severe warping from moisture working its way into the core material. Our Hydrobox solves that problem with 13 hours of water resistance built into the core. Our Hydrocore will not warp like typical plywood components found in your run of the mill RTA cabinets, because of the formulation of our resin fused core that repels water. Bussolotti goes a step further to provide a PUR edgebanding that creates a waterproof glue line with an ABS (Plastic) edgebanding to create an exterior barrier that not only protects your investment and gives you peace of mind that you will not have to replace components due to a common sink leak.

Salt International has done 13 hour comparison studies on Saviola Hydrocore vs the leading composite panels used in RTA cabinets. Cross cut unbanded samples are submerged in water for a 13 hour period. Consistently the composite panel samples swell and delaminate before the 13 hour mark. The Hydrocore is removed with no change to the thickness of the board or raised surface. Saviola produces the only ecological panel on the market that saves discarded furniture from the landfill and uses a non chemical separation process that has zero impact on the environment. Feel great knowing that your boxes are protected from moisture and that your purchase is helping to protect the environment.

## 13 HOURS OF WATER RESISTANCE

STANDARD COMPOSITE PANEL

SAVIOLA HYDROCORE

# MELAMINE VS. PLYWOOD

Not all materials are made the same or have the same specifications. There are materials recommended for specific applications that make life just a little bit easier. Screws have better holding ability than nails – even though both are fasteners.

Efficiency and reliability are the guiding principles behind Bussolotti and the main reason we prefer to use melamine versus plywood for our cabinet boxes. Bussolotti's Hydrocore is a highly stable melamine panel that is made up of a hardwood particulate core. Hardwood composite panels are known for their durability and superior screw holding. Our Hydrocore is fused together with resin that repels moisture, where plywood uses water based adhesives. While water based adhesives are great for the environment they are guaranteed to warp as soon as they come in contact with moisture.

Did Europeans design melamine boards with the intention of making a perfectly sequenced pattern across their cabinet doors – or did that trend come out of a benefit they saw in how the product is made? The beauty of Italian design is in the connections between function and aesthetics. Because of the manufacturing process, the pattern and color is consistent board to board so you are able to offer trends like grain matching. It also eliminates unpleasing elements like knots, mineral streaks, and color differences naturally found in plywood. It also makes it easy to replace doors over time because of the colorfastness that doesn't fade over time.

# CNC PRECISION

Bussolotti uses Italian design that has efficiency at the heart of the system. Components take minutes to assemble and fit together precisely. Human error is eliminated by CNC routing so all cuts are consistently where they should be. Giving you quick and effortless installation that only requires a rubber mallet, drill, and a weatherproof adhesive. We measured twice so you can rest assured that everything will perfectly align every time.

- Predrilled Holes Require No Measuring
- Tops, Bottoms, and Rails include Pre-inserted Hardwood Dowels
- Hinge Cup Holes for Concealed Hinges
- Predrilled for Level Full-Depth Adjustable Shelving
- Gabels Predrilled for Blum Tandembox System
- Dado Inset for Added Strength
- Predrilled for Leg Leveling Kit

Perfectly routed parts do not do much if they are not good materials to start with. Bussolotti researched the best materials that work together for cabinetry applications. The Hydrobox has an inset dado that gives strength to horizontal panels while keeping a square and level box. Hardwood dowels and confirmat screws were made specifically to be used with composite cores for their durability. We recommend TitebondII Weatherproof adhesive in all dado and dowel holes to keep tight joints and extra water resistance in routed areas.

# PREMIUM HARDWARE

## STYLE EQUAL TO RELIABILITY

Salt International has sourced industry leading hardware from Salice and Blum that comes included standard with our system. Our Mahnolia Linen components compliment Blum's Tandembox giving a crisp clean look that accentuates any style from modern to transitional.

## BLUM TANDEMBOX DELUXE METAL DRAWER WITH BLUMOTION SOFT CLOSE UNDERMOUNT SLIDES

Quality and style that lasts. These tried and tested drawers open smoothly and gently, even fully loaded. Drawers close softly with Blum's undermount slides with integrated soft close technology. Easy adjustment with just a few turns. One of the many benefits of this system is the three dimensional adjustment mechanism that allows you to adjust height, tilt and side adjustment of the box.

## SALICE SILENTIA + SOFT CLOSE HINGES

State of the art in soft close technology. From the inventors of the soft close hinge, you can expect premium performance and more from Salice. Soft close hinges slow down doors to prevent from slamming shut while our Silentia+ series is equipped with an innovative switch that allows your door to quickly close to the last 10 degrees before it slows down. Giving you control of how fast (or slow) your doors close. Leaders in innovation and engineering Salice has replaced traditional two way adjustment with one simple turn. Spend less time with adjustments and still get a tight door gap with a perfect close.

LEG110 + PUCK

## PVC LEG LEVELERS

These PVC leg levelers have an extended lip on the socket that shifts the weight to the stronger vertical panel to prevent blowouts from uneven weight on the bottom of the cabinet. Available in three different heights with a total adjustability of 1.25". Providing you with an easy solution for quick and toolless adjustment.

# PVC LEVELING KIT

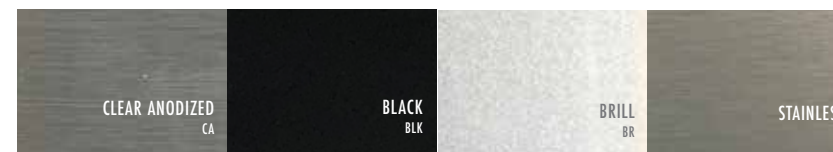

Find the beauty of efficiency. Salt International has curated the best components to configure everything that is needed to install a fully functioning cabinet box in one complete system. We even came up with solutions for components you are not meant to see, like the leveling kit. This lightweight PVC system is lightweight and naturally warp resistant. And can be installed without any shims, screws or nails. Making sure even the smallest details cleanly installed.

## TOEKICK OPTIONS

Bussolotti stocks matching Metal foil covered PVC toekicks to our Gola Finishes, and has capabilities to fabricate any of our 175+ color options in either grain direction. Our integrated toekicks easily clip onto our leg levelers to quickly cover up or access your box levelers.

- \* 4 PVC Leg Levelers come per base cabinet.
- \*\* Leg clips not included in price.
- \*\*\* Dowel works with PVC Toekicks and Screw in work with matching panel toekicks.

# FLAT PACKED

Our #1 priority is to deliver your components in the best condition. When pulling components we carefully inspect each piece before taking to our packing area. Parts will come expertly packed, shrink wrapped on a pallet with like parts together. We will do our best to get component parts as close as possible while keeping a stable palletized unit that prevents damage during delivery.

Your Pallet will be delivered on Peterman Lumber trucks by the same friendly drivers that have been delivering material throughout the Southwest. Peterman Lumber is an expert in handling high grade materials, and delivering them with care to your fabrication shop, or job site. Talk to your sales representative about our LTL shipment capabilities.

# GOLA HANDLE-FREE SYSTEM

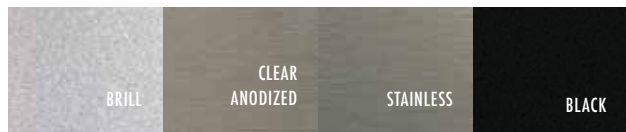

## SIMPLE. CLEAN. EFFICIENT.

Designed to be a clean solution for a large bank of doors or drawers. The Gola system is routed to fit in flush to your cabinet box. Leaving an exposed decorative metal extrusion to eliminate the need for individual knob or pull hardware on each door.

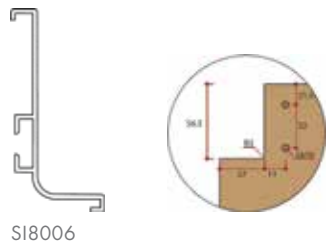

This is our most efficient and low profile hardware system. Salt International pre-routes and drills cabinet boxes for all these profiles to make installation simple. Just select the color of the exposed channel and components will be packaged as a kit and ready to go. Our Gola system is a perfect match to our metal Toekick color options.

All of our extrusions are also available as LED lighted options.

# FILO & KARMEN

## FINGER PULL SYSTEM

Same sleek look as our Gola system - but used as finger pull application where the installation is on the doors instead of the cabinet box.

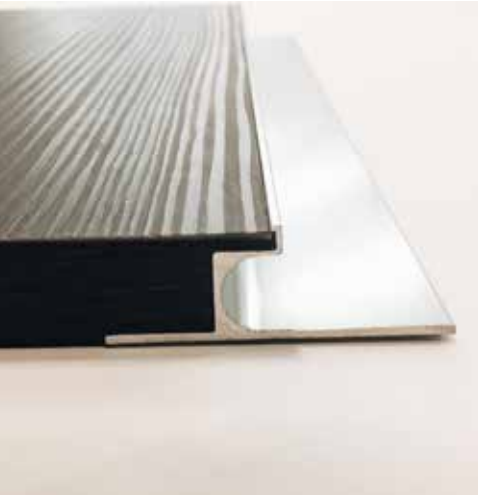

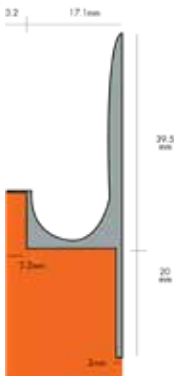

Filo & Karmen extrusions give a nice metal grip on the top of your doors or drawers. These two profiles can be used exclusively, but if used together give a beautiful recessed metal separation between drawers. A much faster and economical alternative to install on large banks of doors and drawers than traditional pulls.

## INSTALLATION

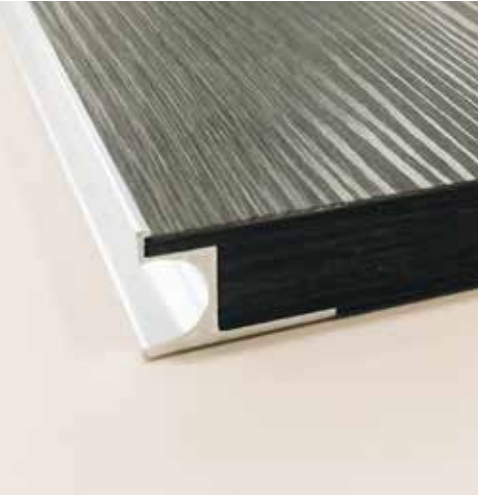

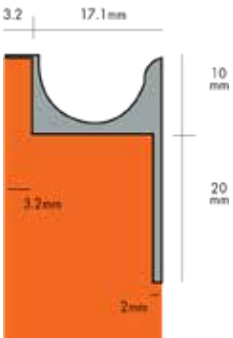

Simply route one edge of your doors and screw on the extrusion. Filo and Karmen are two separate profiles but the application is the same. Filo Profile is most commonly used as the upper, and Karmen as the lower. This system is available as extrusion only and is not available pre-routed on your doors.

Filo & Karmen come in 9ft lengths.

### KARMEN SIKARMEN27

### FILO SIFILO27

# LOLA SCALABLE PULLS

HANDLES THAT WIDEN WITH  
THE OVERALL LENGTH OF THE DRAWER

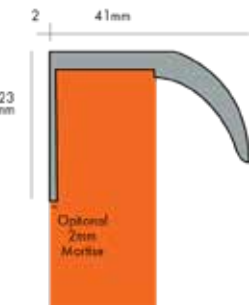

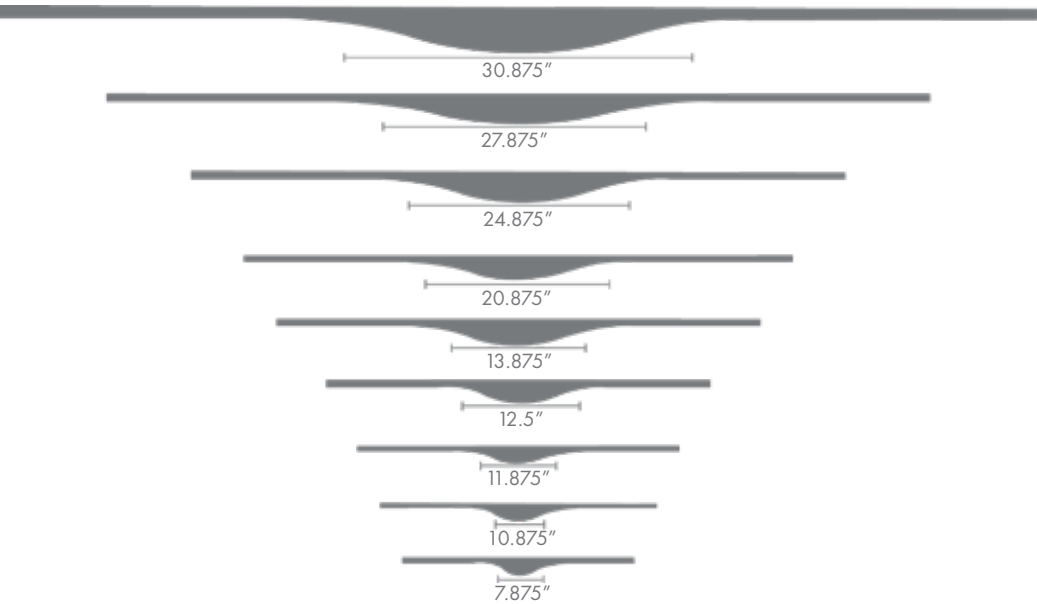

Our Lola Drawer Pulls are designed to be cut to the size of your drawer. What makes these drawer pulls so unique is that the teardrop handle scales to be wider as the overall length of the drawer increases, so you have a handle that never looks too large or too small. Lola gives a decorative touch that is subtle, but will not go unnoticed.

Available in lengths from 12" - 48" and can be used in a vertical or Horizontal application. Lola can be screwed on directly to the door, with an optional 2mm rabbet for flush mounting. Lola is available as extrusion only and is not available pre-routed on your doors.
