PRODUCT GUIDE

EDITION 3

COORDINATED MATERIALS FOR ANY APPLICATION

Prefinished Materials without limitations.

Peterman Lumber has put together a full line of perfectly matched materials that seamlessly integrate consistent pattern and texture onto any surface. Do not settle for the closest match. We make it easy by working directly with manufacturers to make sure the Board, HPL, and Edge-banding is perfectly matched from the source. We have hand selected In-Demand Textures in colors meant for the Southwest market from Industry Leading Companies like Merino with the goal to have beautiful and durable textures that match regardless of the application.

PRODUCT ADVANTAGES

- Perfectly Matched
- Saves Fabrication time
- Best quality doors on the market
- Consistency you can trust - if you need a replacement down the road
- In-Demand Textures
- On Trend colors from Europe hand selected for the Southwest Market
- Extremely Durable
- Consistent Stable Color
- Prefinished Materials
- Materials from Industry Leaders

MEISTER

Meister by Merino is a selection of on-trend colors that are highly requested. This curated selection is primarily available in a Matte UV lacquered finish, with a bright Solar White in a high gloss UV Finish. Merino's PU+ Technology improves the ability to cut and drill without chipping. This technology is exclusive to Merino products. During manufacturing, a polyurethane film goes down first, and then three layers of Polyacrylic coating go down to ensure the maximum matte effect. It is durable, antibacterial, hygienic, and resistant to scratches.

*The colors shown are depictions only and are likely to vary from actual colors. Color selection should be made based on viewing physical samples.

METALAM

Metalam Laminates combine the durability of metal with the versatility of laminates. It's designed for vertical interior or ceiling applications to add unique accents, moods, and highlights. These laminates feature a real metal foil with a kraft paper and resin core layer. This results in a real metallic surface that can be fabricated like other laminates.

*The colors shown are depictions only and are likely to vary from actual colors. Color selection should be made based on viewing physical samples.
